

PRODUCTS AND SERVICES

2022 /2023

Who are we?

GGPEN is the entity responsible for managing and monitoring the development of the National Space Programme, supervised by the Ministry of Telecommunications, Information Technology and Media (MINTTICS), a legal entity under public law, with personality, administrative, financial and patrimonial autonomy.

Mission

Promote the peaceful use of outer space.

Vision

Turn the country into a reference of excellence in the space field with worldwide recognition.

Values

Dedication, secrecy, professionalism, rigour and honesty, respect for the autonomy conferred by law by the Angolan State on the supervisory bodies.

PRODUCTS AND SERVICES

“From space we create a better future”

PRODUCTS

SATELLITE IMAGERY

Satellite imagery is crucial for vast and rapid visualization of assets in near real-time.

APPLICABILITY

- Mapping;
- Visualization;
- Analysis;
- Detection;
- Monitoring.

Work with our experts to define the type of image that best suits your needs.

“ Look at the world from a new perspective “

SERVICES

TECH-GEST

TECH-AGRO

TECH-ECOLOGIA

We offer the most modern technological solutions for the detection and monitoring of your assets on the national market.

We provide reports and GIS dashboards to support decision making based on artificial intelligence analytics.

TECH-GEST

TECH-GEST is a service that makes use of updated, high-resolution satellite images for infrastructure monitoring, asset management, change detection, land use and land cover mapping.

TECH-AGRO

TECH-AGRO is a service aimed at farmers, which allows them to analyse the state of agricultural fields from the monitoring of plant development using the vegetation index obtained from satellite and drone data.

TECH-ECOLOGIA

TECH-ECOLOGIA is a solution that makes use of satellite radar images to detect, monitor and warn about the occurrence of oil spills in the national offshore.

BENEFITS

- Optimisation in the use of resources;
- Added value in service provision;
- Reduction of operating costs;
- Payments in national currency;
- Increased productivity.

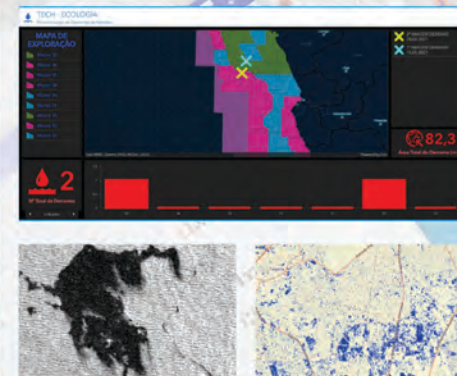

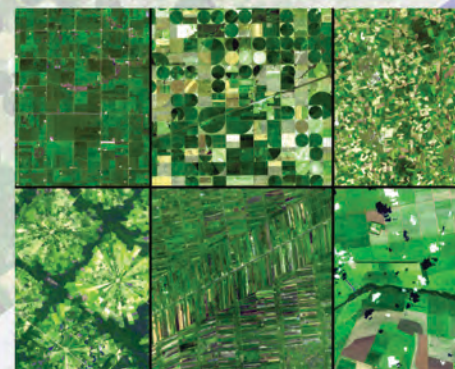

SERVICES

MONITORING

- Oil Spill;
- Illegal Construction;
- Change Detection;
- Buildings and Road Construction;
- Strategic Infrastructure Monitoring;
- Deforestation.

OTHER SERVICES SUCH AS:

- Land use and landcover maps;
- Agricultural maps (General Map of the Property and Altimetry Map);
- Urban maps for land control.
